XSORB SUPER ABSORBENT

THE BEST AVAILABLE TECHNOLOGY

For those who are truly concerned about reducing our carbon footprint or potential groundwater contamination. Liquids or semi liquids absorbed by XSORB are actually held by the XSORB particle and will not leak or leach after disposal.

Xsorb Universal

This universal absorbent will pick up any liquid or semi-liquid on contact. Designed for use indoors or outdoors on all hard surfaces. Simply sweep away any spill or leak, whether hazardous or non hazardous, including water, oils, acids*, food products, paints, bases, coolants, and cutting fluids.

XSORB Outdoor

This is the same product as XSORB Universal except it is specially formulated for use in light windy conditions.

XSORB Select

This unique product, made using proprietary XSORB technology, is specially designed to remove petroleum-based products including oil, gasoline, diesel, xylene, toluene, and mineral spirits from the surface of water (can be used when separating oil from snow upon melting, or on wet/rainy days to increase cost efficiency). This product floats on water to absorb hydrocarbons while repelling water indefinitely.

XSORB Edge

A product that is heavier than clay but a superior cleaner, outperforms commercial absorbents. Penetrates and lifts the spill. Leaves surfaces dry, passes the slip test.

*XSORB products not for use with hydrofluoric acid

56 LITRE LARGE BAG

These convenient large bags are designed for easy storage and use. With a pull tab top for fast opening, these products will handle spills up to seven gallons (26 litres).

- XB110** XSORB Universal Super Absorbent
- XB110S** XSORB Select Super Absorbent
- XB110N** XSORB Acid Neutralizing
- XB25D** XSORB Outdoor Super Absorbent
- XB30G** XSORB Edge Aggressive Absorbent
- XB110B** XSORB Caustic Neutralizing

6 LITRE BOTTLE

Designed for convenient handling and storage. Great for light commercial and home use.

- XL37** XSORB Universal Super Absorbent
- XL37D** XSORB Outdoor Super Absorbent
- XL37N** XSORB Acid Neutralizing
- XL37B** XSORB Caustic Neutralizing
- XL37S** XSORB Select Super Absorbent
- XL37P** XSORB Super Encapsulated

XL37

2 LITRE BAG

Economical, resealable bag. Perfect for small spills anywhere.

- XB111** XSORB Universal Super Absorbent
- XB111D** XSORB Outdoor Super Absorbent
- XB111S** XSORB Select Super Absorbent
- XB111N** XSORB Acid Neutralizing
- XB111B** XSORB Caustic Neutralizing
- XB111P** XSORB Super Encapsulated
- XB111PC** XSORB Super Encapsulated With Disinfectant

XB111

XB111N

XT16

16 LITRE PAIL

XT16 XSORB Universal Super Absorbent in a pail. Comes with a scoop. An excellent container for high traffic areas or areas of changing atmospheric conditions. (Example: Placed beside fuelling station)

XSORB II SUPER ENCAPSULATED

This all new unique engineered blend, turns difficult waste into solid waste for easier disposal.

XSORB II SUPER ENCAPSULATED WITH DISINFECTANT

Designed for blood and other biological hazardous spills and comes in our bio-hazard kits. This product is rapidly gaining popularity in the food, beverage and hospitality sector for its disinfecting abilities. If you have a

liquid or semi-liquid spill that needs to be cleaned, forget the mop, hot water and pail. Cleans efficiently and is less time consuming.

BK 107

XL37PC

BIOHAZARD KITS

Our bio-hazard kits are designed to aid in rapid and safe response to biologically hazardous spills such as blood and body fluids. Our absorbent and disinfectant handle the job quickly and safely, leaving no messy and dangerous residue, and protection is provided for the user. Fully compliant to government standards.

ROCK SOLID PAINT SOLIDIFIER

Landfills will not accept paint in liquid form. XSORB Rock Solid paint solidifier is the best environmental option for quick, easy and safe disposal. Just add to paint and shake or stir. Paint thickens into a disposable solid within minutes. Dispose in accordance with local regulations. Great for spills, too. Simply sprinkle, mix and sweep. Leaves surfaces clean and dry. Available in a 2 litre bag or a 16 litre pail.

XB111R

SPILL PADS

If it's pads you need, we carry a large variety, from take along spill squares, perforated, oil only, universal, rolls or hazmat. Pads for light, medium or heavy absorption. Some even showing in preliminary testing to absorb up to 18 times the pad weight. Quality that's non-negotiable. A cheap pad cost more in the long run because you have to use more pads to get the job done. Our pads consistently provide maximum performance, so it takes less pads to clean up more, helping to reduce waste too.

RPPUB

PILLOWS

XSORB Universal Pillows are easy to use for quick spill response indoors or out. They are also great for use under and around leaky machinery, pipes, or barrels.

XSORB floating pillows absorb petroleum-based products while allowing water to filter through them. Used for quick petroleum spill response on any water surface or around drains.

Available in two sizes. 8" x 18" or 18" x 24". Gravel bags are also available.

PWS818

SOCKS

XSORB Universal Socks are ideal for surrounding water or oil-based spills. Our unique socks absorb quickly and more effectively than cellulose or polypropylene, holding up under rigorous use. Socks are available in 4 ft. lengths and 10 ft. lengths as well as hazmat and oil only.

XS24

XS310

BOOMS

XSORB Netted Booms, which are similar to our socks but netted together for strength and equipped with rope ties and hooks, are designed to be linked together to cover large areas of water. Available in 10 ft. lengths by 5 inch and 8 inch width. We also carry netted bilge booms and sump booms.

XNB310S

SPILL KITS

XSORB super absorbent products are available in pre-packaged spill response kits to aid in rapid and economical response to spills. We can do economy kits and kits up to 95 gallons for the larger spill or we can build custom spill kits at your request. (Not all spill kits are the same. When comparing spill kits, the quality and design of the contents can be of more value than the quantity)

XS310

XS310

We also do drain protectors right up to drain guards for parking lots, gas stations, maintenance shops, manufacturing facilities or urban runoff at your request. Other products that can be available are spill drip pans, drum basins and spill pallets. Silt fencing, straw wattles and jute netting are used for erosion control.

ROOFTOP GREASE PROTECTION

With kitchen exhaust fans, like it or not grease happens. Right over your head, right now: fats, oil and grease may be destroying your roof and creating a real fire hazard. Talk to us about a grease catcher with XSORB pillows.

XSORB...SUPER ABSORBENT

What is XSORB super absorbent?

XSORB is an engineered super absorbent, designed to clean up a wide range of liquid and semi-liquid spills in a variety of industries. Simply sweep spills away, leaving surfaces clean, dry and non-slippery. Highly absorbent, economical, and light weight, XSORB is the most effective and versatile absorbent on the market today.

XSORB is made from a natural blend of silica minerals, which when expanded in our unique manufacturing process, makes a white or light grey material that absorbs spills instantly on contact.

XSORB is non-toxic, non-flammable, non-cancer causing, non carcinogenic (will not cause silicosis) and environmentally friendly. It can normally be used on any surface without damage, including asphalt, concrete, carpet, tile, or linoleum. It is also harmless to animal or plant life and has been approved by Agri-Food Canada for use in food establishments.

How does it work?

XSORB absorbs liquids by means of silica absorption and solidification. Because of their countless internal cells, XSORB particles provide tremendous surface area when compared to their volume. This shape provides excellent bonding characteristics, which contributes to the exceptional absorption qualities of XSORB. The liquid absorbed is actually held within the XSORB particle and will not leak or leach out after disposal. It removes on contact all spills of animal, chemical, or vegetable-based liquids (except hydrofluoric acid).
